PROBLEM STATEMENT

Lectures Check

Dune State University would like all their Professors to record the lectures and upload them to their Learning Management System so that the lectures are available for students to watch anytime. With each video a PDF file too is uploaded. The system needs to validate the video for topic wise coverage. It also needs to match the video content and PDF and show its analysis.

PROCESS

01 Professors will record and upload lectures to their learning management system . where each lecture is accompained with a PDF

02 The system validates video content for topic coverage and match with the PDF

03 Analysis results, presented as percentages and graphs

OBJECTIVES

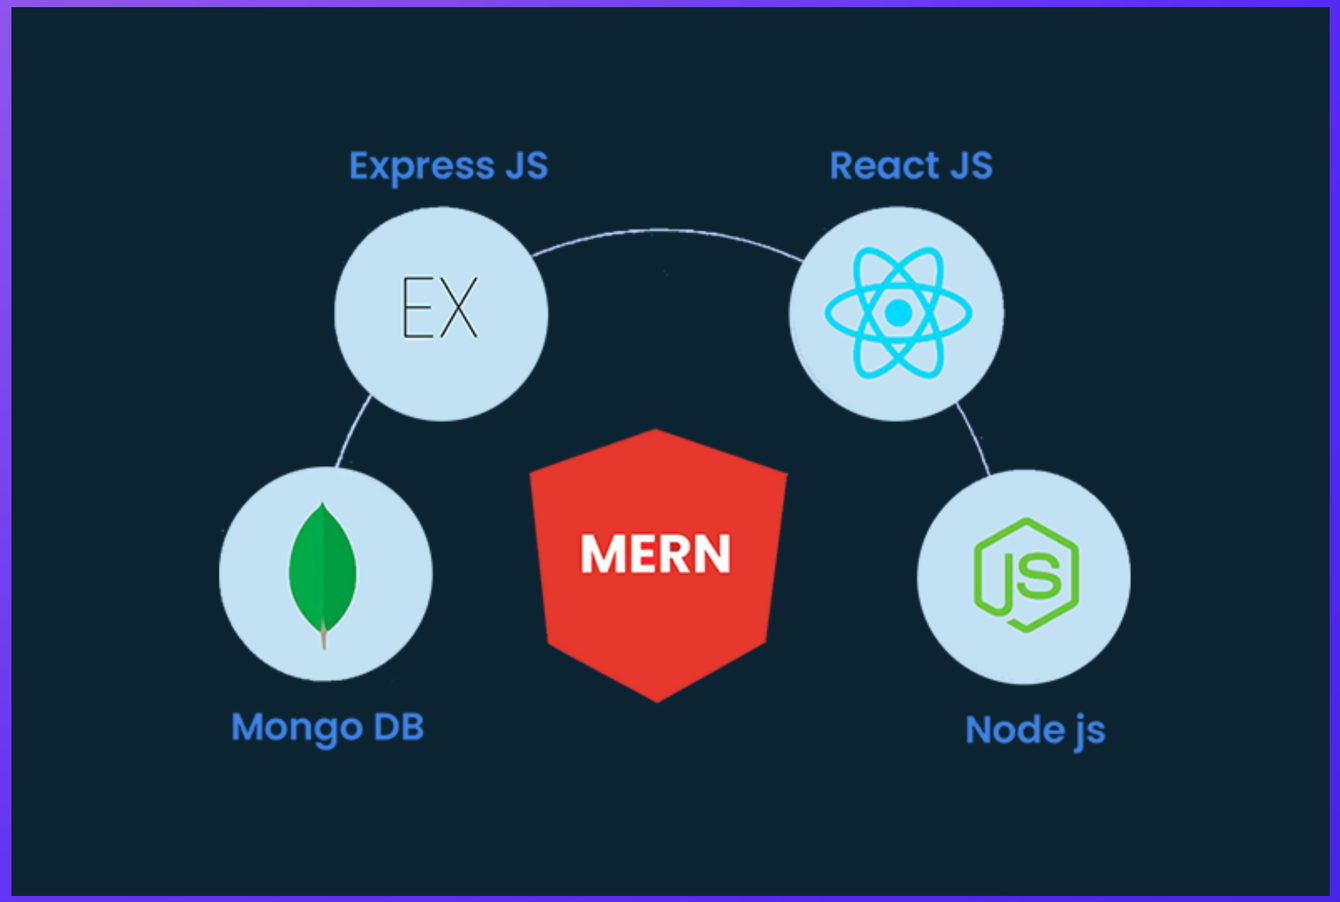
01 Topic-wise Validation of Videos

02 Matching Video Content with PDFs

03 Provide clear analysis

04 Offer accessible insights for improvement

TECHNICAL STACK



THANK YOU!
